## Minecraft magic wands mod 1. 12. 2

Author: romelo333 | 4 weeks ago | 190.601 views Not enough wands Mod 1.16.4/1.15.2 adds different usage sticks to Minecraft. The main strength of this mod is configurability. Features: Swap wall: Select a block and make sure you have enough of that block in your inventory. Then you can replace other blocks with this block. Has a single mode, 3x3 mode, 5x5 mode and a 7x7 mode (a bit like the Wall of Equal Trade). In the future, this wand will also have undo functionality. Teleportation Wall: Right-click forward to the teleport (by default) 30 blocks. When you right-click a block, the player is teleported to that block if space is available. If not, the player is teleported next to the block. Catch Wand: Capture any living mob (hostile or not) with a left click. Release it with a right click. Building Wall: Simply extend your builds with this wand. Has multiple modes and also features ando for the last two building operations! No more accidental doubling of the floor. Lighting wand: glow dark spots easily with this wand. Movable rant: Pick up a block (normal blocks and tile elements such as chests, ovens, spawners, aura nodes, ...) and place it elsewhere. Configurable to make it more expensive to move some blocks, and it is also possible to move blocks from the blacklist. Shift Stelaus: Press or drag blocks or a rectangle of blocks. Also works on tile entities. Protective rod: Protect blocks from explosions or harvesting attempts. Each wand can only protect blocks protected by the same wand. You can create backups of your wands. Master Protection Wall: This wand can protect blocks protected by any other wand. Acceleration chopsticks: This wand accelerates block ticks (such as plants, saplings, ...) as well as tile entity ticks (spawners, ovens, ...). It has three modes that refer to how fast it should accelerate. For each wand you can configure the following settings: Availability (not available, only creative, simple recipe, hard recipe) If it should use shelf life If it should use XP If (and how often) it can be generated in chests. Some wands in this mod have different modes. You can change the mode of a magic wand with the key '=' (default, you can change this in the key bindings). Screenshots: Crafting Recipes: Requires: Minecraft Forge McJtyLib How to install: Make sure you've already installed Minecraft Forge and McJtyLib.
